

***PUBLICLY OWNED ENTERPRISES AND SOCIAL ECONOMY:
WHICH STRATEGIES IN ECONOMIC, SOCIAL AND ENVIRONMENTAL
TRANSITIONAL PROCESSES?******33rd CIRIEC Congress – Thessaloniki (Greece), 4-6 June 2020*****SCOPE AND TOPICS OF INTEREST**

The profound and rapid transformations in the way we consume, work, produce or cohabit are running up against the limits of our current economic and social models.

The adaptations and shifts to undertake are even more important and necessary due to the various transitions (digital, environmental, economic, societal, etc.) underway. Many challenges, such as increasing inequality or weakening political and economic democracy, must be addressed, preferably collectively.

On the horizon are indeed new world orders with very different visions and consequences depending on the orientations chosen and

the responses provided.

Socio-economic models should gear towards the general interest and meeting the needs of individuals and communities, whether in the public sphere or in the social and solidarity economy. Such models must constitute pillars for new socially responsible economic development, and provide satisfactory and sustainable responses to these global challenges.

The issues discussed at the 33rd CIRIEC International Congress in Thessaloniki will focus on the **STRATEGIES OF PUBLIC AND SOCIAL ECONOMY ENTERPRISES** in terms of:

1. **Digital networks and platforms as tools in the transition**
2. **Public sovereignty to be organised/maintained in data protection**
3. **Fiscal capacity and digital taxation methods**
4. **Cross-sectoral integration of network companies**
5. **Local development co-constructed with social economy and public actors**
6. **Impact measurement and contribution to sustainable development**
7. **Better governance, societal performance and transparency of public enterprises**
8. **Territorial dynamics to be recreated or reinvented**
9. **Co-production of public goods and commons**
10. **New modes of dialogue and interaction between actors (place and role of citizen action and collective action)**
11. **Partnerships to build the future**

SCIENTIFIC COMMITTEE

The Jury will be chaired by Philippe BANCE, President of CIRIEC's International Scientific Council, Université des Antilles, CIRIEC-France.

Apart from the president, the Jury is composed of the following members:
